Jenkins findet Dateien aus gui-package nicht – auch im grünen build .....	2
Umbenennung des package gui2 von commit 307 – 310 .....	3
Änderung des Classpath bei Revision 568.....	4

## Jenkins findet bestimmte .jars nicht – auch im grünen build

Letzter grüner build: <http://jenkins.timadurus.org/job/wppetrinetze/268/consoleFull>

Jenkins scheint die jars nicht zu finden, aber ältere die jars von älteren builds zurück zu greifen?

Warum sollte das build sonst durchlaufen?

```

Auffällig ist auch, dass die Datei gui2/todo gesucht wird, obwohl sie regulär gelöscht wurde.

## Umbenennung des package gui2 von commit 307 – 310

<http://jenkins.timadorus.org/job/wppetrinetze/307/changes>

Da war der build aber schon rot.

(positiv) Auffällig: In der `build.xml`

([http://jenkins.timadorus.org/job/wppetrinetze/ws/build.xml/\\*view\\*/](http://jenkins.timadorus.org/job/wppetrinetze/ws/build.xml/*view*/)) steht ganz unten als Main-

Klasse die `gui.Main` – nicht die `gui2.Main`

# Änderung des Classpath bei Revision 568

Bei Jenkins:

<http://jenkins.timadorus.org/job/wppetrinetzte/310/changes>

Vorherige Version des .classpath (Revision 447)

```

31  <classpathentry kind="output" path="bin"/>
32 </classpath>
```

Auffälligkeiten: Es sind in Zeile 31,32 die beiden .jars hinzu gekommen, die bei Julia auf dem Laptop fehlen. Es ist das exported=true hinzu gekommen.
